

Transfer into the UL Architecture course

External Transfer Applicants

Applications are invited for transfer into the architecture programme at UL. Such applicants should have successfully completed at least one year of study in a Level 8 accredited degree programme in Architecture. All transfer applications will be assessed on an individual basis, on their merit.

Only students who have previously studied architecture in a level 8 accredited degree programme can be considered for transfer.

Transfer application procedure

Eligible transfer applicants should apply directly to the Admissions Office, University of Limerick, by submitting a completed Undergraduate Studies Application form, together with a CV, a list of detailed certified results (transcript), two references from current academic tutors and a Statement of Motivation. The closing date for receipt of applications for transfer entry into full-time undergraduate programmes is 1st July. Further information is available on the Admissions website www.ul.ie/admissions. Subsequently, applicants may be invited for interview, prospectively held in mid-July and will be invited to bring material to support their application to the interview.

Applicants are expected to be available for interview at the specified time if this is required. Offers of places are normally issued through the University's Admissions Office in July/August.

Further details on the formal application process are available on this web link:

<https://www.ul.ie/academic-registry/transferring-another-3rd-level-institution>

Statement of Motivation

The Statement of Motivation must give evidence of the applicant's ambitions, interests and approach within the study of architecture. It should also identify reasons for wishing to join the School of Architecture at UL.

Transfer applicants should be in good academic standing.

Closing date for receipt of completed applications is 1st July 2023. Further details can be obtained from Admissions website www.ul.ie/admissions or email: admissions@ul.ie
